Note.—Tables 8 and 9 are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontispiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E, or W according as they constitute the northern, southern, eastern or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

No. 9.—Rainfall Index—Weighted Average Ratio of Actual to Normal Rainfall (New South Wales).

Normal Rainfall for each month = 100.

Returns collected from wheat-growers in April and May, 1949, indicate that the area sown with wheat (for all purposes) in the 1949-50 season will be 4.257,000 acres. The Department of Agriculture forcasted on December 6, 1949, that the area harvested for grain in 1949-50 would be 4,002,000 acres, and the crop for grain in 1949-50, 76,000,000 bushels.

^{*} Average during whole year, including working proprietors. † The value of production is determined by deducting from value of output at the factory the value of raw materials, containers, fuel, water, oil, etc. used, tools replaced and repairs to plant and machinery. Depreciation is not deducted. ‡ Excluding amounts drawn by working proprietors.

^{*} Value in Australian currency.
† Source—quantity, 1947 and 1948, Joint Coal Board; value, returns under Census Act.
‡ Includes clays (brick, tile, pipe, etc.), building materials (granite, marble, etc.), road materials and gravels.

^{*} Represents gross value at place of production less value of goods used in the process of production, e.g., fodder, seed, fertiliser used on farms, and raw materials and fuel in factories.

[†] Calendar years 1937 to 1947.

No. 29.—Monthly Production Statistics—New South Wales.

Quantities of Certain Articles Manufactured and Mined.

The following statistics of production are obtained principally by means of returns collected monthly from producers by the Government Statistician of N.S.W. in conjunction with the Commonwealth Statistician. The figures for 1948–49 are subject to revision on receipt of annual returns. Production from June to August, 1949, was affected by an industrial dispute in coal mines and power restrictions.

Private Building—Particulars relate to (a) permits issued by local councils for houses and flats (including estimates for unrecorded areas) and (b) approvals by the Building Control Authorities for other buildings.

[†] Not available.

Government Building-Particulars relate to contracts let and works authorised or commenced by Commonwealth, State or Local Authorities.

No. 38.—Wholesale Trade—N.S.W.

Approximate Amount of Sales by Traders Registered under Sales Tax Acts.

(Wholesalers trading only in exempt goods do not supply returns and recorded sales, as shown below, do not necessarily represent a constant proportion of total wholesale trade, owing to changes in the scope of the sales tax.)

† Includes part of Commonwealth grant towards losses due to an industrial dispute in coal mines and power restrictions, viz., Railways £3,000,000, Trams and Buses £200,000.

No. 60.—State Taxation—New South Wales.

The Australian States ceased to levy Income Tax from 1st July, 1942, and Entertainments Tax from 1st October, 1942, upon the introduction of the Commonwealth uniform tax schemes. The States are reimbursed for loss of tax revenue, by (a) an annual grant from the Commonwealth and (b) arrears of State Income Tax collected; the amounts received by New South Wales are shown below:—

^{*} The annual data supplied by each company relate to its financial year (ended mainly in September or December of year specified),

[†]The index represents the ratio of each month's clearings (calculated on a three months' moving average) to the average for the corresponding period in the years 1926 to 1930 (taken as 100 in each month). The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels.

No. 80.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	Manufactur- ing and Distributing Companies.	Retail Companies.	8 Public Utility Companies.	Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.	Active Share included in foregoing.

No. 82.—Employment in New South Wales—Wage and Salary Earners in Civil Employment, Governmental and Private.

(1) The estimates shown below are based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax. (2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month irrespective of whether they were actually working at the end of the month. (3) Working proprietors, wage earners in rural industry, female domestics in private households, members of defence forces at home or abroad and Government "relief" workers are not included.

^{*} Price stabilisation level.

No. 86.—Wholesale Price Index-Numbers: Basic Materials and Foodstuffs.

(Compiled by the Commonwealth Statistician.)

The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base: Average 3 years ended June, 1939 = 1,000.)

^{*} Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally.

No. 87.—Export Price Index-Numbers—Australia.

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which constitute at present about 80 per cent. of all exports. The prices of the commodities are multiplied by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

Base of each section: Average of 3 years ended June, 1939 = 1.000.

Period.	Wool.	Wheat.	Butter.	Metals.	Meats.	Gold.	All Groups (including Gold).
